Industry Overview

Companies in this industry provide services such as local and long-distance calling, internet access, and TV program distribution over fixed-line telecommunications networks. Major U.S. companies include AT&T, Charter Communications, Comcast, and Verizon Communications; major international wireline carriers include BT Group (the U.K.), China Telecom, Nippon Telegraph and Telephone (Japan), and Orange (France).

The global wired telecommunications services industry comprises about 970 million fixed telephone subscriptions and nearly 920 million fixed broadband internet subscriptions, according to the International Telecommunication Union. China has the most fixed telephone lines (194 million), followed by the US (120 million), Japan (64 million), Germany (44 million), and Brazil (41 million).

The U.S. wired telecommunications services industry includes about 36,000 establishments (single-location companies and units of multi-location companies) with combined annual revenue of more than \$315 billion.
